

SPOT

QUICK DRYING SYSTEM

Fillon
Technologies™

SPOT

SPEED AND VERSATILITY

For hard-to-get-at places

For drying small areas

Programmable control box

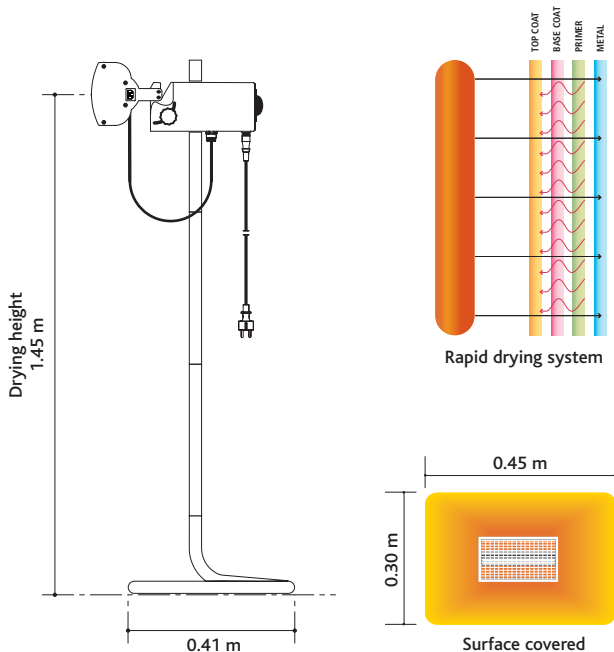

ADVANTAGES

Applications

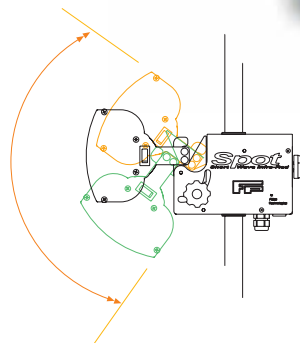

- Ideal for drying small areas in record time
→ particularly for putty and primers.
- Used manually it can be directly exposed to the repaired area
→ particularly for hard-to-get-at areas (trunk, bottom of body panels...).

Molarity with or without

- The stand using the adjustable height and angled module.
- Programmable control box with 30-minute timer.
- Separate heating module (light and ergonomic) for manual use.

SPOT >

Speed up drying time for small repairs.
